## WORK HISTORY

**Android developer** VASL | 10/2019 - 04/2020 | Tehran

During my internship, I implemented most of the introductory and secondary topics of Android programming into separate projects. That eventually led to the creation of a repository of all the major Android programming topics that we named Android Boot-Camp. And it's a good reference for beginners. After my internship, I was developing real company projects.

## PROJECTS
