FARAMARZ AFZALI

Android & Java developer

SUMMARY

Self-motivated hard worker junior developer with the enthusiasm for learning more about technologies that relate to Java and Android. I've been programming for about one year. I first started with the Java SE and then continued with Android development. Also, I am currently working on Spring framework courses to consolidate my knowledge in the Back-end field.

SKILLS

Android

- Kotlin
- MVVM
- MVP
- Retrofit
- Room
- Hilt
- Coroutines
- Git

Java

- JavaSE

WORK HISTORY

Android developer VASL | 10/2019 - 04/2020 | Tehran
During my internship, I implemented most of the introductory and secondary topics of Android programming into separate projects.That eventually led to the creation of a repository of all the major Android programming topics that we named Android Boot-Camp. And it's a good reference for beginners. After my internship, I was developing real company projects.

PROJECTS

- **Movieo**
- **GitHubApplication**
- **Android Utility SDK**
- **Kalinga Mobile App**
- **Android-bootcamp**
- **Covid19 Tracker Java App**
