WORK HISTORY

Android developer VASL | 10/2019 - 04/2020 | Tehran

During my internship, I implemented most of the introductory and secondary topics of Android programming into separate projects.That eventually led to the creation of a repository of all the major Android programming topics that we named Android Boot-Camp. And it's a good reference for beginners. After my internship, I was developing real company projects.

PROJECTS

- **GitHubApplication**
- **ValueSelector (Android library)**
- **Covid19TrackerJavaApplication**
- **Movieo**
- **Android Utility SDK**
- **Kalinga Mobile App**
- **Android-bootcamp**
- **Aircraft Encyclopedia (Google Play)**
